1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-9, 23-31 and 40 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Konopka.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

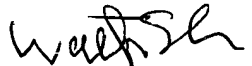

5. Claims 10-12 and 32-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Konopka in view of Hale et al, of record.

Konopka discloses all of the claimed subject matter, note figs 1 and 2, except for using an LED to produce a in response to the energy discharge from the storage device. Hale teaches using a light bulb to produce a cue as claimed. It would have been obvious to produce a cue as claimed in the device of Konopka in view of the teaching of Hale. The use of an LED is considered an obvious design consideration.

Art Unit: 2862

6. Claims 13-22, 35-39 and 41 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
